Opening Ceremony

Over time, the opening ceremonies of the OESO Congresses have become exceptional encounters. ... a privileged moment when artists take over the event to present a unique creation.

*

- Our 9th will open by the shores of the Mediterranean where the Arts and the Sciences first saw light. The sea, its ebb and flow, its horizon, will mark this opening performance where talented voice will blend with uncommon staging.

As for the Avignon OESO Congress, we will put on a creation, a première, but in a different mood, another color, to strike a harmonious chord with our new surroundings.

- Following the performance, we will exit from the Congress Center and, with the "Côte d'Azur" as a backdrop, we will have, before us, an equestrian surprise.

But we'll say no more here.

(Photo Serge Meyer)

The third wave of the evening will invite you into the secrets of the Japanese Garden of Monaco. ... in dream world, a timeless moment. Can we really be in the very heart of Monte Carlo? A welcoming reception which again will have unexpected musical events.

*

We hope you will join us in this multi-colored paradise to open, together, an extraordinary 3 days.

*Plan your trip to arrive in time for this date, and reserve the event early, as seats will be limited.
(Entrance free of charge with registration fee)*
